Foreign Ownership of U.S. Agricultural Land Through December 31, 1983

J. Peter DeBraal
T. Alexander Majchrowicz

FOREIGN OWNERSHIP OF U.S. AGRICULTURAL LAND THROUGH DECEMBER 1983, by J. Peter DeBraal and T. Alexander Majchrowicz. National Resource Economics Division, Economic Research Service, U.S. Department of Agriculture. Washington, D.C. 20250. ERS Report No. AGES840328, April 1984.

ABSTRACT

Foreigners owned 13.7 million acres of U.S. agricultural land of December 31, 1983. This is slightly more than 1 percent of all privately held agricultural land and 0.6 percent of all land in the United States. This share is too small to measure the impact on agriculture at the national level. However, some communities in areas of heaviest concentration could be affected. These findings are based on an analysis of reports submitted in compliance with the Agricultural Foreign Investment Disclosure Act of 1978.

Keywords: Agricultural land, foreign landownership, landholdings, land acquisitions, land dispositions.

PREFACE

This report is made pursuant to section 5 of the Agricultural Foreign Investment Disclosure Act of 1978 which requires the Secretary of Agriculture to (1) analyze information on foreign ownership of U.S. agricultural land (farmland and forestry) required to be reported under the act; (2) determine the impact of such ownership, particularly the effects on family farms and rural communities; and (3) determine the efficiency and effectiveness of the reporting requirements. The act requires an annual report on a calendar-year basis. This report covers information received through December 31, 1983.

Foreigners buy USA land, but we're in control

By Wayne Blessert
USA Today

Foreign interests own 13.7 million acres, or slightly more than 1% of the USA's agricultural land — up 287,000 acres from 1982. But control of the land is closer to home than the numbers indicate.

USA corporations with 5% or more foreign ownership control 63% of that land, or 8.6 million acres.

Almost 8 million acres, or 57% of the land under foreign interests, is timberland, with the largest chunk of that in Maine. Three timber companies — two of them USA companies with partial foreign ownership — control 95% of the foreign-held acres in Maine.

Only 14% of the land is planted in crops, while pasture and other agricultural uses account for 24%. The remaining 5% is in non-agricultural or unreported uses.

According to the U.S. Department of Agriculture's Economic Research Service, which surveyed the ownership, foreign owners plan to keep 92% of their acreage in agricultural production.

Thirty-five percent of foreign holdings are in the South, with another 29% in the West and 20% in Maine. Rhode Island is the only state without foreign-owned agricultural land.

Five locations — Canada, the United Kingdom, Hong Kong, West Germany and the Netherlands Antilles — account for 73% of foreign ownership. Because many worldwide corporations register in the Netherlands Antilles for tax reasons, ownership attributed to those islands is scattered internationally.

The \$312,200 study by the Department of Agriculture also showed that corporations own 83% of foreign-held acreage; partnerships, 9%; individuals, 7%; and estates, trusts, associations, institutions and others, 1%.

SUMMARY

Foreign persons reported that they owned 13.7 million acres, or slightly more than 1 percent, of U.S. agricultural land (farmland and forestry) as of December 31, 1983. This figure is 278,000 acres larger than last year's figure. These and other findings are based on an analysis of reports submitted to the U.S. Department of Agriculture under the Agricultural Foreign Investment Disclosure Act of 1978.

Forest land accounts for 57 percent of all foreign-owned acreage, cropland for 14 percent, pasture and other agricultural land for 24 percent, and nonagricultural and unreported uses for 5 percent.

Corporations own 83 percent of the holdings acreage; partnerships, 9 percent; and individuals, 7 percent. The remaining 1 percent is held by estates, trusts, associations, institutions, and others.

U.S. corporations, in which 5 percent or more of the ownership is foreign, reported owning 63 percent of all the foreign-held acreage. The remaining 37 percent was reported as being held or acquired by foreign persons not affiliated with a U.S. corporation.

A number of parcels are owned only in part by foreign investors; that is, the foreign interest in some parcels is less than 100 percent, with the remaining percentage being owned, for example, by a U.S. partnership. When the 13.7 million acres are adjusted for these partial interests, the total foreign-owned acreage drops to 12.4 million acres, a reduction of 11 percent.

Foreign persons from Canada, the United Kingdom, Hong Kong, West Germany, and the Netherlands Antilles account for 73 percent of the foreign-held acreage.

The largest number of acres owned by foreign persons was reported in Maine. Foreign holdings in Maine account for 20 percent of the total reported holdings and 14 percent of the total privately owned agricultural land in Maine. Three large timber companies own 95 percent of the foreign-held acres in Maine. One company has only partial interests in 33 percent of the acres and the other two companies are U.S. companies which are partially foreign owned.

Except for Maine, foreign holdings are concentrated in the South and West--35 percent of the holdings are in the South and 29 percent in the West. Rhode Island is the only State with no reported foreign-owned agricultural land.

Foreigners do not appear to be taking purchased agricultural land out of production. No change in intended use at the time of filing was reported for 92 percent of the acreage. No change in tenure was reported for 42 percent of the acres while some change was reported for 29 percent of the acres. No responses regarding tenure change were received for the remaining 29 percent of the acres.

In general, the quantity of foreign-owned U.S. agricultural land remains too small to measure the impact on agriculture at the national level. In areas of heaviest concentration, some communities could be affected.

Data gathering and analysis cost the U.S. Department of Agriculture approximately \$310,000 for 1983. In fiscal year 1983 and the first quarter of fiscal year 1984, the Department assessed 207 penalties for late filings, amounting to approximately \$109,500.

FOREIGN OWNERSHIP OF U.S. AGRICULTURAL LAND THROUGH DECEMBER 31, 1983

A Report to the Congress Under the Agricultural Foreign Investment Disclosure Act*

INTRODUCTION

Foreign individuals and entities reported owning 13.7 million acres of U.S. agricultural land as of December 31, 1983, an amount that represents slightly more than 1 percent of all privately owned U.S. agricultural land.

The objectives of this report are to (1) analyze information sent to the Secretary of Agriculture by foreign persons; (2) determine the impact of foreign ownership of agricultural land, particularly the effects on family farms and rural communities; and (3) determine the efficiency and effectiveness of the reporting requirements.

Summary of the Act

The Agricultural Foreign Investment Disclosure Act (AFIDA) was signed by the President on October 14, 1978, ^{1/} and the regulations thereunder became effective February 2, 1979. ^{2/} Briefly, the law, as implemented by the regulations, requires all foreign persons holding agricultural land as of February 1, 1979, to file a report of such holdings with the Secretary of Agriculture by August 1, 1979. All foreign persons who acquire or dispose of agricultural land on or after February 2, 1979, are required to report such transactions within 90 days of the transfer. In addition, any foreign person who holds land which subsequently becomes agricultural land or any person who holds agricultural land who subsequently becomes a foreign person must also file a report within 90 days of such change.

AFIDA specifies in detail the information to be supplied by the foreign person and provides that necessary additional information may be obtained by the Secretary. The information required to be reported consists of the legal name and address of the foreign person; citizenship, if an individual; if not an individual or a government, nature of the legal entity, including the entity's country of creation and principal place of business; type of interest; legal description; acreage; purchase price or any other consideration given; and intended use. In the case of a disposition, the seller is required to give the legal name and address of the purchaser; citizenship, if the purchaser is an individual; and if the purchaser is not an individual or government, the nature of the entity, country of

* This report was prepared by J. Peter DeBaal, general attorney, and T. Alexander Majchrowicz, agricultural economist, in the Natural Resource Economics Division, ERS. Cleve Gladney and Karen Mizer, Data Services Center, ERS, provided the data processing assistance. Laura Crenshaw prepared the manuscript.

^{1/} Pub. L. No. 95-460, 7 U.S.C. §§ 3501-3508 (1982).

^{2/} 7 C.F.R. §§781.1-.5 (1983). See 7 C.F.R. §§ 2.21(b)(34), .27(b)(15), .65(a)(34), and .85(a)(15) (1983) for the delega-

creation, and principal place of business. Failure to comply with AFIDA subjects the foreign owner to a possible civil penalty of up to 25 percent of the fair market value of the interest held in the land in question.

In accordance with section 7 of the act, completed report forms are made available for public inspection in Washington, D.C., within 10 days of receipt by the Secretary. Section 6 of the act requires that every 6 months the Secretary transmit to each State completed report forms for foreign-owned agricultural land in that State.

Definitions

For this report, the term "holdings" applies to all U.S. agricultural land owned by foreign persons as of December 31, 1983. For those transactions which occurred in 1983, the terms "acquisitions" and "dispositions" refer to U.S. agricultural land acquired or disposed of, respectively, by foreign persons. These terms are used as the titles for the subsequent sections analyzing the data reported under the act.

"Agricultural land" is defined in the act as all land used for agricultural, forestry, or timber production purposes. The regulations further refine this definition by including idle land if its last use within the past 5 years was for agricultural, forestry, or timber production purposes. The regulations exempt all land that is held in parcels of not more than 1 acre in the aggregate from which agricultural, forestry, or timber products are less than \$1,000 in annual gross sales and such products are for the use of the person holding an interest in the land.

AFIDA requires reporting "any interest" in the land other than a security interest (a mortgage or other debt-securing instrument). The regulations exempt leaseholds of less than 10 year duration, contingent future interests, and those noncontingent future interests that do not become possessory upon termination of the present estate. In addition, nonagricultural easement and rights-of-way are exempt. In an interpretation issued by the U.S. Department of Agriculture (USDA), an interest solely in mineral rights is also exempt.

A "foreign person," as defined in the act, includes any individual who 1) is not a U.S. citizen or national, 2) is not a citizen of the Northern Mariana Islands or the Trust Territories of the Pacific Islands, or 3) is not lawfully admitted into the United States for permanent residence. Any person who holds Immigration and Naturalization Service Form I-151, I-155, or I-551 (green card) is considered lawfully admitted for permanent residence and is exempt from the requirements of the act. Foreign governments, entities which are created under the laws of a foreign country or have their principal place of business in a foreign country, and entities which have a significant foreign interest in the United States are also exempt.

For this study, individuals are defined as one person or a husband and wife. The "partnership" category includes all legally defined partnerships, joint ventures, and tenancies in common which include two or more persons who are not married. The term partnership does not differentiate between joint tenancies and tenancies in common. In the interest of simplicity and brevity, fine legal distinctions, however important in an individual case, are ignored.

Each foreign entity holding land is required to file a report. Therefore, if two individuals own land as a partnership, the partnership is to file one report as a partnership, with the partners' names and citizenship listed on the back of the form. Occasionally, however, two people will file as individuals, each filing a separate report on the same land with a partial interest of, for example, 50 percent listed on each form. Because it is not always possible to distinguish separate reports for the same land, two such individuals cannot be differentiated from one partnership. This may occur when there is no legal partnership but individuals own the land as tenants in common. If they file together on one form, they are automatically considered a partnership. If they file separately, they are generally considered individuals. Therefore, the data on individuals and partnerships and the number of reported parcels should be used with caution.

The act is designed to impute foreign person status to certain U.S. entities holding direct and indirect interests in U.S. agricultural land. For purposes of the act, this is accomplished by defining each successive link in a chain of U.S. entities containing foreign interests as a foreign person. However, only the foreign person who actually holds the direct interest in the land (that is, the first layer or tier) is considered the reporting entity. This entity need not actually be foreign, but under the act it is deemed a foreign person because another foreign person holds a significant interest or substantial control in it. (The regulations define "significant interest or substantial control" to mean a 5-percent or more interest in the entity.) In some instances, that second tier also may not actually be foreign but may be deemed foreign under the act for the same reason. The indirect foreign owner of the real estate may be at the end of a line of U.S. entities, each of which is owned at least 5 percent by the preceding U.S. entity defined to be a foreign person.

Under the regulations, the reporting entity is required to disclose, in addition to information about the land, certain information about the second-tier interest. The regulations also provide that the second-tier interest may be asked to disclose information about the third tier. Some respondents have given information on tiers beyond those required to be reported without being requested to do so. In those cases, the information on the last tier is used.

According to the regulations, the reporting entity, whether

individual or government, provide information (names, addresses, citizenship, and the nature of the entity) on all foreign persons individually holding a 5-percent or more interest in the entity. This 5-percent standard differs from the standard for determining whether or not an entity is required to file at all. In the latter instance, if several foreign persons cumulatively own 5 percent or more of the entity, and no single individual owns a 5-percent interest, the entity is defined as a foreign person and is required to file a report. However, such an entity may not be required to list the names, addresses, and related information about the foreign holders individually holding less than 5 percent of the entity.

When the foreign person is an individual from, or an entity created under the laws of, for example, West Germany, the report is processed as "Germany (West)." Where persons from many different countries hold direct and indirect interests in one piece of land, an attempt is made to identify the predominant country as the country of origin. When there is no predominant country--for example, an equal partnership between a Canadian and a West German--the report is processed as "Multiple." Reports filed by U.S. corporations with foreign shareholders are classified "U.S./ (foreign country)." For example, a U.S. corporation with a Canadian shareholder who owns 5 percent or more of the shares of the U.S. corporation is processed as "U.S./Canada." Similarly, a U.S. corporation owned by another U.S. corporation which is 5 percent or more owned by a Canadian corporation is processed as "U.S./Canada." Where foreign shareholders with 5-percent or more interests are from a number of countries, none of which predominates, the report is processed as "U.S./Multiple." If several foreign persons from different countries cumulatively own 5 percent or more of the U.S. corporation and no single person owns a 5-percent or more interest and there is no predominant foreign country, the report is processed as "U.S./ Multiple < 5%." If three or more tiers of U.S. corporations are listed with no foreign interest indicated, the report is processed as "U.S./Third Tier." Noncorporate entities with U.S. interests are processed under the predominant country of origin.

U.S. agricultural land owned by a U.S. entity deemed a foreign person under the act (the party legally responsible for providing the information required by the act) is reported from the standpoint of the U.S. entity rather than that of the foreign shareholder.

The AFIDA procedures provide for land to be reported by parcels. All land held in the same manner (type of interest), located in one county, and acquired at the same time is considered a parcel and is to be reported on a single form. Land does not have to be adjacent to be considered part of one parcel. This parcel

report their names in exactly the same way on each form, it is difficult to attribute these forms with great precision to one person or legal entity. Some foreign persons hold land in their own names and also hold interests in entities which own other lands. These entities are treated as separate owners.

The data in this report should be viewed in light of the foregoing caveats and those accompanying the tables. Reporters' errors must also be considered in reviewing this study. Resulting data deficiencies are noted and highlighted as appropriate. The "No Report" category in the tables means that a response to the particular question was not made. Note that the acreage figures reported do not mean that they are wholly owned by foreign investors. Of the 13.7 million foreign-owned acres, 63 percent are owned by U.S. corporations that are 5-percent or more foreign owned (table 8). In addition, a number of acres are owned only in part by foreign investors. See, for example, table 2, which gives the acreage equivalent for those foreign owners reporting partial interests in the real estate. These partial interests reduce the 13.7 million acres of foreign holdings of U.S. agricultural land to an equivalent of 12.4 million acres.

ANALYSIS OF DATA REPORTED UNDER THE ACT

Holdings

Data in this section are derived from the 14,806 reports filed by foreign persons who held land as of December 31, 1983. These report forms account for 13,739,602 acres of all U.S. agricultural land. This is an increase of 278,574 acres over last year's figure. This 278,574-acre increase is less than the 331,882 acres acquired during 1983, as reported in the acquisitions discussion. Dispositions filed in 1983 for land disposed prior to 1983 and acreage reductions for foreign persons whose status changed to nonforeign were the reasons for this occurrence.

Concentration of Foreign Ownership of U.S. Agricultural Land

Foreigners have reported acreage holdings in 49 States, Puerto Rico, and Guam (fig. 1 and table 1). Rhode Island is the only State with no reported foreign-owned agricultural land. Except for Rhode Island and Maine, only a small proportion of the privately held agricultural land in each State is foreign owned (fig. 2 and table 1). Deleting the acreage for Maine from the Northeast data, foreign investment is concentrated in the South and West which contain 35 and 29 percent, respectively, of all reported foreign holdings of U.S. agricultural land (table 9).

Maine has the largest amount of foreign-owned U.S. agricultural land, 2,687,408 acres, or 14 percent of the privately owned agricultural land in the State and approximately 20 percent of the reported foreign-owned U.S. agricultural land. Most of the foreign-owned agricultural land in Maine, 2.6 million acres, is

1/ 1980 LAND AREA FROM GEOGRAPHY DIVISION, CENSUS BUREAU.

2/ PRIVATELY HELD LAND BASED ON T. FREY, UNPUBLISHED DATA, ECON. RES. SERV., U.S. DEPT. AGR., 1979. ESTIMATE OF TOTAL LAND LESS PUBLIC, INDIAN, TRANSPORTATION, AND URBAN LANDS.

various percentage interests in 883,000 acres. The other two companies, accounting for 793,000 and 886,000 acres, are U.S. companies which became foreign persons because they passed the 5-percent AFIDA threshold figure which defines foreign ownership.

Georgia, South Carolina, and Hawaii have the next largest proportions of reported foreign-owned agricultural land to all privately owned agricultural land in their States.

Geographical Distributions

To more accurately examine the location of foreign investment in U.S. agricultural land, an analysis of such investment was made at a descriptive level which is more location specific than provided by statewide data. In a recent report, ^{3/} data collected under AFIDA through December 31, 1982, were calculated to give levels of foreign investment in agricultural land by county. In another report examining the location of foreign investment, ^{4/} the geographic distribution of U.S. agricultural land acquired by foreign investors between 1980 and 1982 was shown to differ significantly from the distribution of land purchased prior to 1980. Analysis of the variation in distributions suggests that the activities of real estate agents and monetary exchange rates influence the location and timing of foreign investment.

Characteristics of Foreign Owners

Type of Foreign Owner--Individuals are the most common type of owner. They account for 51 percent of the owners, followed by corporations, 34 percent, and partnerships, 12 percent (table 2). The remaining 3 percent of the owners are estates, trusts, institutions, associations, and others such as real estate investment trusts, church groups, and foreign organizations not identifiable with the above categories.

Corporations own 50 percent of the parcels and 83 percent of the acreage; individuals, 36 percent of the parcels and 7 percent of the acreage; partnerships, 12 percent of the parcels and 9 percent of the acreage; and all others, 2 percent of the parcels and 1 percent of the acreage. When partial interests are taken into account, foreign-owned acreage drops from 13.7 million acres to an equivalent of 12.4 million, but distribution among the types of owners remains virtually the same.

Corporate-held parcels average 1,536 acres, or 3,952 acres per holder, while individual-held parcels average 173 acres, or 213 acres per holder. Partnership holdings average 715 acres per parcel, or 1,223 acres per holder, and all other holdings average 572 acres per parcel, or 659 acres per holder.

^{3/} T. A. Majchrowicz & J. P. DeBaal, Foreign Ownership of U.S. Agricultural Land Through December 31, 1982: County-Level

**TABLE 2--U.S. AGRICULTURAL LANDHOLDINGS BY TYPE OF FOREIGN OWNER,
DECEMBER 31, 1983
(NUMBER)**

OWNER	OWNERS	PARCELS	ACRES	PARCELS WITH PARTIAL INTERESTS 1/	ACREAGE EQUIVALENT 2/
INDIVIDUAL	4,292	5,292	916,273	503	783,371
CORPORATION	2,874	7,395	11,356,599	560	10,245,980
PARTNERSHIP	1,044	1,787	1,276,848	259	1,164,195

TOTAL	8,498	14,806	13,739,602	1,337	12,376,726

1/ PARCELS WITH PARTIAL INTERESTS ARE THOSE PARCELS WHICH ARE OWNED ONLY IN PART BY THE FOREIGN INVESTOR; THAT IS, A PERCENTAGE INTEREST LESS THAN 100 PERCENT.

2/ ACREAGE EQUIVALENT EQUALS THE TOTAL ACREAGE REPORTED MULTIPLIED BY THE PERCENTAGE HELD BY THE FOREIGN OWNER.

Size of Holding--Holdings are concentrated with smaller acreages held by individuals and larger acreages held by corporations (tables 2 and 3). Owners of parcels with less than 300 acres (70 percent of all of the foreign owners) hold less than 3 percent of the land and owners of parcels with 300 acres or more (the remaining 30 percent) hold more than 97 percent of the land (table 4). Part of this concentration can be explained by the definition of agricultural land, which includes extensive uses of land such as ranching and forestry and intensive uses of land such as orchards and vegetable farms. The different unit sizes due to differences in use may also explain part of the acreage differences among the States.

In States where foreigners own few parcels, the possibility of one or two unusual situations prevents any generalization about concentration. For example, one large timber holding by a foreigner in a State with a large number of field-crop farms could easily be misinterpreted to suggest that a single foreigner was taking over the farming of the State.

Purchase Price and Value of Holdings--As noted earlier under "Type of Foreign Owner," corporations own 83 percent of the acreage. However, corporate purchase price and nonpurchase price (estimated value) at time of acquisition account for only 75 percent of the total purchase price (table 5). The average per acre purchase price and nonpurchase price (estimated value) at time of acquisition was the lowest for corporations at \$671; followed by individuals, \$1,018; partnerships, \$1,076; and all others, \$1,233.

For recent acquisitions, purchase price generally will be close to, but not necessarily the same as, current value. As time passes, purchase price becomes a poor indicator of current value. For this reason, reported current value by date of acquisition

1/ PURCHASE PRICE AND NONPURCHASE PRICE AT TIME OF ACQUISITION.

was adjusted to April 1983 for all years prior to 1983 (table 6). The total adjusted current value indicates a 2-percent increase in the reported current value. The adjustment factor was based on the national average change in farmland value over time. The adjusted current values are not presented as absolute values for the foreign-owned land in this report but should be viewed as approximations of change in value.

The data in table 6 are not intended in any manner to indicate trends over time in the level of acquisitions by foreign persons. Acreage owned in the years listed is the total amount of land that was reported purchased during that year and which remained foreign owned at the closing date of this report, December 31, 1983. Because land is continually being disposed by foreign owners or there are changes in status from foreign to nonforeign, acreage amounts in each year are decreased by these land dispositions or status changes.

Table 7 adjusts reported current value by State for the same reasons given in the discussion of table 6. Because the reported current value in table 7 is adjusted by each State's

^{2/} REPORTED CURRENT VALUE REFLECTS VALUE AT TIME OF REPORTING AFTER FEBRUARY 1, 1979.
^{3/} REPORTED CURRENT VALUE ADJUSTED TO APRIL 1, 1983. REPORTED CURRENT VALUE FOR HOLDINGS ACQUIRED IN 1983 IS UNADJUSTED.

average annual change in farmland value, the total adjusted current value will differ from that of table 6. Simply explained, not all land values in table 6 would have changed at the national average. Therefore, the total adjusted current value in table 7 should be a better measure of value than that of table 6. The total adjusted current value by State indicate a 11-percent increase in reported current value.

Country of Origin--Of the 13,739,602 acres of foreign-held agricultural land reported by foreign persons, 63 percent is held by U.S. corporations with foreign interests. The remaining 37 percent is held by foreign persons not connected with a U.S.

TOTAL ALL LANDHOLDINGS	8,498	14,806	13,739,602

2,834,748 acres, or 21 percent. Adding to this the 1,471,127 acres owned by foreign persons from Canada not connected with a U.S. corporation raises Canadian ownership to 31 percent of all of the reported foreign-held acreage. Foreign persons from the United Kingdom (U.K.) and Hong Kong own 1,929,114 and 1,867,592 acres, respectively, an additional 28 percent. Foreign persons from West Germany and the Netherlands Antilles own 1,195,322 acres (9 percent) and 777,210 acres (5 percent), respectively. These five countries of origin own a total of 10,075,113 acres, or 73 percent of all reported foreign-owned holdings of U.S. agricultural land. Approximately 2 percent of the acreage, 322,471 acres, is owned by unidentifiable Third Tier persons; that is, the acreage is not attributable to any foreign country of origin because no foreign country of origin is listed through the third tier of ownership.

Foreign persons from Canada, foreign persons from West Germany not affiliated with a U.S. corporation, and U.S./U.K. corporations own the greatest number of parcels. Foreign-persons from Canada and West Germany account for the largest number of owners reporting.

In the South, U.S./Canada, U.S./U.K., U.S./West Germany, and U.S./Netherlands Antilles corporations own 2,440,116 acres, or 51 percent of the foreign-held acres in the region (table 9). An additional 712,607 acres, or 15 percent, are owned by foreign persons from these four countries not affiliated with a U.S. corporation. Five percent of the acreage, 260,811 acres, is owned by unidentifiable Third Tier foreign persons.

In the West, U.S./Hong Kong corporations own more acres than any other single group--16 percent. Foreign persons from Canada, the Netherlands Antilles, West Germany, and the United Kingdom reported owning 1,848,628 acres, or 47 percent. An additional 632,705 acres, or 16 percent, of the foreign holdings in the West were reported by U.S./Luxembourg and U.S./Netherlands corporations and foreign persons from Hong Kong and Japan not associated with a U.S. corporation. Foreign persons from Canada not associated with a U.S. corporation reported the largest number of parcels, 32 percent, but accounted for only 7 percent of the acres.

In the Northeast, foreign persons from Canada reported owning the most acreage--2,027,769 acres, or 57 percent. U.S./Hong Kong corporations reported owning an additional 973,658 acres, or 28 percent, bringing the concentration of foreign ownership between these two countries of origin to 85 percent of the foreign-held acreage in the Northeast. The sizable Canadian figure is attributable to one Canadian corporation with partial interests in 9 parcels covering 883,000 acres and one U.S./Canada corporation owning 28 parcels covering 886,000 acres. The Hong Kong figure is attributable to one U.S./Hong Kong corporation which owns 25 parcels covering 974,000 acres. Foreign persons from Canada not affiliated with a U.S. corporation reported owning 59 percent of the parcels, but, removing the nine parcels

In the North Central region, foreign persons from the United Kingdom reported owning 521,233 acres, or 37 percent, of the total foreign-held acres reported in the region. U.S./Hong Kong corporations and foreign persons from West Germany and Canada reported owning an additional 458,559 acres, or 33 percent. Ten percent of the acreage is owned by U.S./Multiple entities, U.S. corporations which have foreign owners from a number of countries, none of which has a predominant interest in the corporation.

Interest in Land

Of the 14,806 parcels of foreign-held U.S. agricultural land, 82 percent of the parcels, accounting for 81 percent of the reported acreage, is held in fee interest whole (that is, the owner holds the estate in its entirety). Partial interests are held in another 9 percent of the parcels and reported purchase contracts cover an additional 7 percent of the parcels (table 10)

OTHER	3,580	2,543.0
FOREIGN OWNER	4,167	4,812.0
NO REPORT	311	427.0

Under the AFIDA regulations, leases of 10 years or longer are the only leases that need be reported.^{5/} Leases are treated separately because they represent a totally different type of interest. Questions on value, tenure, and method of acquiring land do not apply because the report form was not devised to deal with leases. The Department has received 371 reports covering a net total of 889,924 acres of leased land. Timberland accounts for 610,156 acres, or 69 percent of the reported foreign leaseholds.

Method of
Acquisition

More foreign investors reported paying cash for their U.S. agricultural landholdings than using any other method of acquisition. Of the total foreign-owned parcels, 48 percent, covering 35 percent of the acreage, were acquired for "Cash Only" (table 10). This compares with 34 percent of the parcels, containing 18 percent of the acreage, which were acquired by "Credit Only," and 3 percent of the parcels, containing 17 percent of the acreage, which were acquired by "Other Method Only." The "Other Method Only" category includes mergers, corporations that became foreign persons by having more than 5 percent of their shares held by foreigners, or an individual exchanging land for stock in a new corporation.

Relationship of
Foreign Owner to
Representative

Forms were most commonly completed by the foreign owners. These owners completed and filed forms accounting for 28 percent of the parcels, or 35 percent of the total acreage (table 10). The second largest group is the "Other" category, which includes accountants, family members, and people associated with or employed by corporations. People in the "Other" category filed forms for 24 percent of the parcels representing 19 percent of the foreign-held agricultural land.

Land Use

Fifty-seven percent of the reported foreign-owned holdings of agricultural land is timber or forest land (table 11); cropland accounts for only 14 percent. Cropland, pasture, and other agricultural land (which includes, for example, orchards and vineyards) total 38 percent of all foreign-owned holdings, but only 0.4 percent of all privately held agricultural land in the United States. The "Other Nonagriculture" and "No Report" categories account for 5 percent of the reported foreign-held acres. Nonagricultural land includes acreages such as the homestead and roads commonly reported as part of the agricultural landholding or land that is idle now but its last use within the past 5 years was for agriculture.

Foreign persons from Canada own 3,613,470 acres, or 46 percent, of the reported forest landholdings. U.S./Hong Kong corporations hold an additional 22 percent of the forest land, followed by foreign persons from the United Kingdom with 14 per-

TOTAL ALL LANDHOLDINGS	1,913,926	2,770,094	7,812,590	566,165	675,145	1,682	13,739,602

cent. Unidentifiable Third Tier foreign persons own 4 percent of the forest acreage. The size of the Canadian and Hong Kong holdings are attributable to (1) a Canadian corporation with partial interests in 9 parcels covering 882,955 acres, (2) a U.S./Canada corporation which owns 160 parcels covering 2,083,402 acres, and (3) a U.S./Hong Kong corporation which owns 62 parcels covering 1,685,171 acres.

Foreign persons from West Germany, the Netherlands Antilles, and Canada own the most cropland, 948,752 acres, or 50 percent. Foreign persons with the next largest holdings of cropland are from the United Kingdom and Switzerland, each with 8 percent.

Foreign persons from the United Kingdom and West Germany own 33 percent of the pastureland, 924,299 acres, followed by foreign persons from Canada and the Netherlands Antilles, each with an additional 10 percent. Foreign persons from Mexico, the Netherlands, and Switzerland and foreign persons from Japan not affiliated with a U.S. corporation own an additional 22 percent, or 601,909 acres.

The largest group of owners of other agricultural land are foreign persons from the United Kingdom who own 14 percent of the acres. They are followed by foreign persons from Canada, the Netherlands Antilles, and Switzerland who own a total of 184,620 acres, or 33 percent. Foreign persons from the Netherlands and West Germany and U.S./Luxembourg corporations own an additional 129,729 acres, or 23 percent. The largest group of other nonagricultural landowners are foreign persons from Canada and U.S./U.K. corporations with 38 percent of the acreage.

Based on reports by foreign owners who reported owning only forest land or forest land and other nonagricultural land, these reports account for 53 percent of all the foreign-owned U.S. agricultural land (tables 1 and 12). The remaining 47 percent is primarily farmland, although it includes some forest and/or other nonagricultural land commonly reported as part of the farm landholding (table 11).

The average parcel size for parcels with forest land or forest land and other nonagricultural land is 2,323 acres (table 12). Except for Maine (with 37 percent of the acreage, the uniqueness of which has been noted previously), the forest or forest and other nonagriculture acres are concentrated in the South and West. Alabama, Georgia, Mississippi, the Carolinas, and Tennessee account for 34 percent of the acres reported. California, Idaho, Oregon, and Washington account for an additional 14 percent. There are also notable holdings in Michigan, Minnesota, New Hampshire, New York, and Pennsylvania, accounting for a further 13 percent of the acres.

Individuals make up the largest number of owners reporting holdings of forest land or forest and other nonagricultural land but account for only 15 percent of the parcels and 1 percent of the acres (table 14). Corporations reported holding 68 percent of the parcels, representing 94 percent of the acreage. The remaining 17 percent of the parcels and 5 percent of the acres are held by partnerships, trusts, estates, and others. When partial interests are taken into account, the acreage equivalent is 903,614 acres less than the acres for which reports were filed.

Owners of parcels with less than 300 acres, 68 percent of all the owners, own 18 percent of the parcels covering only 0.4 percent of the forest land or forest and other nonagricultural land (table 15). The remaining 32 percent of the owners, owning parcels with 300 or more acres, own 82 percent of the parcels covering 99.6 percent of these lands.

Intended Use

Concern has been expressed about farmland being purchased and taken out of agricultural production. Foreigners do not appear to be proceeding in this direction in any substantial degree. However, the following data on intended use and tenure, like much of the use and value data, are based on information at the time of filing; they do not reflect subsequent changes.

No change in intended use was reported for 92 percent of the acres (table 16). Intended use changes to other agricultural usage were reported for holders of 2 percent of the acres. Reports for 5 percent of the acres indicate that some change to nonagricultural use is intended. Such reports do not necessarily mean, however, that all of these acres will be changed. What the reports do mean is that the holders of these acres intended to change the use of some of the acreage. However, the report form does not ask how many acres will be involved. Reports representing 1 percent of the acres did not indicate intended use.

Tenure

Tenants and foreign owners operate 33 percent and 35 percent of the parcels of foreign-held U.S. agricultural land, respectively, whereas managers only operate 8 percent of the parcels (table 17). No responses to the tenure question were received for the remaining 24 percent of the parcels. However, tenants operate 23 percent of the acres while foreign owners directly operate 50 percent and managers 6 percent. No responses on tenure were received for the remaining 21 percent of the acres. Foreign owners directly operate the largest number of the acres of U.S. agricultural land in all regions of the country.

Rental agreements were reported for 5,347 parcels, or 36 percent, covering 25 percent of the acres. Of the rental agreements, cash agreements accounted for 65 percent and cropshare agreements for 34 percent of the parcels.

Tenure Change

No tenure changes were reported for 38 percent of the parcels,

of the parcels containing 29 percent of the acres indicate a new tenure arrangement on at least part of the land. The number of acres affected by the new tenure arrangements are not reported. Thus, the acreage may be overstated; that is, all of the acres in these parcels are not necessarily affected by new tenure arrangements. Nevertheless, reports for 0.3 percent of the parcels, accounting for 0.2 percent of the acres, indicated that some of the tenure arrangements would remain the same and some would change. No responses on tenure changes were received for 26 percent of the parcels containing 28 percent of the acres.

In the South, new tenure arrangements were reported for 48 percent of the parcels containing 43 percent of the acres, whereas no tenure change was reported for 35 percent of the parcels and 29 percent of the acres. The North Central region also has more acres and parcels reporting tenure changes than the West and Northeast which reported more parcels and acres with the same tenure arrangements than new ones. However, in the Northeast, reports for 47 percent of the parcels accounting for 52

Acquisitions

The data in this section are net figures for U.S. agricultural land acquired by foreign persons between January 1 and December 31, 1983; that is, the total reported acquisitions data for the year less dispositions data for lands that were acquired and disposed during the year.

Foreign persons reported that they acquired 587 parcels of U.S. agricultural land covering 331,822 acres during 1983 (tables 18 and 19). Included in these acquisitions data are reports filed by U.S. entities which became foreign during 1983. This change occurs when a 5-percent or more interest in a U.S. entity is subsequently acquired by a foreign person. Consequently, all of the reported acres are not necessarily recent land purchases. These acquisitions could include land held for any length of time by a U.S. entity which recently came within the definition of foreign person under the act.

The reported acquisitions data should be regarded as preliminary in that it understates to some degree the total acreage acquired by foreign persons during the 1983 report year. Because foreign persons have a statutory 90 days within which to report their acquisitions, not all of the acquisitions acquired in the 90 days preceding the December 31, 1983, closing date of this report were received for processing by USDA. Therefore, many reports for the months of October, November, and December are not included in this report. Table 40 shows that the distribution of acquisition dates during 1983 is skewed toward the first three quarters of the year. In addition, a further understatement of the acreage acquired by foreign persons in 1983 would result from transaction reports that were not timely filed and/or completed by the closing date of this report. Consequently, these reports would not have been processed for inclusion in this report.

Concentration of Foreign Acquisitions of U.S. Agricultural Land

Colorado, Florida, Georgia, Maine, and Texas are reported to have the largest acreages acquired from January 1 through December 31, 1983 (table 18). Their total of 222,104 acres represents 67 percent of the acres acquired during this period.

Characteristics of Foreign Owners

Type of Foreign Owner--Corporations reported acquiring 55 percent of the parcels during this period (table 19). Individual account for 12 percent of the acres acquired during this period; corporations, 76 percent; partnerships, 12 percent; and trusts 1 percent. When partial interests of foreign investors are taken into account, the total acreage figure drops from 331,822 to an acreage equivalent of 311,133, but the distribution among the types of owners remains virtually the same.

Corporations acquired an average of 773 acres per parcel, or

1/ PARCELS WITH PARTIAL INTERESTS ARE THOSE PARCELS WHICH ARE OWNED ONLY IN PART BY THE FOREIGN INVESTOR; THAT IS, A PERCENTAGE INTEREST THAN 100 PERCENT.

2/ ACREAGE EQUIVALENT EQUALS THE TOTAL ACREAGE REPORTED MULTIPLIED BY THE PERCENTAGE HELD BY THE FOREIGN OWNER.

The largest number of parcels acquired by individuals during the period was reported for Texas (table 20). However, the largest acreage acquired by individuals was in Georgia. Organizations also reported acquiring the largest acreage in Georgia.

Size of Acquisition--The largest number of owners reported their acquisitions in the range of 100 to 999 acres (table 21). However, owners of parcels with 1,000 acres or more (14 percent of the owners) acquired approximately 80 percent of the acres and owners of parcels with less than 1,000 acres (86 percent of the owners) acquired the remaining 20 percent of the acres. Parcels ranging in size from 300 to 1,000 or more acres accounted for 8 percent of the value. The value per acre, however, is concentrated in the reports of holders of less than 20 acres--\$20,878 per acre, compared with \$730 per acre for holdings of 1,000 or more acres.

Purchase Price and Value of Acquisitions--As noted earlier, under "Type of Owner," corporations acquired 76 percent of the acquisitions. They also account for 70 percent of the purchase price and nonpurchase price (estimated value) at time of acquisition (table 22). The average per acre purchase price and nonpurchase price (estimated value) is lowest for corporations at \$1,056; followed by trusts, \$1,258; individuals, \$1,326; and partnerships, \$1,486. For acres for which current value was reported, corporations remain the lowest at \$1,071 per acre. However, trusts report the highest value per acre at \$2,929; followed by partnerships, \$1,507; and individuals, \$1,337.

For recent acquisitions, purchase price will be close to but n

Equity is frequently used to measure net foreign investment transfer. To approximate equity, debt was subtracted from current value for all reports that provided information on debt and current value. The 571 reports providing information on debt, \$164,846,000, and current value, \$380,138,000, resulted in an equity figure of \$215,292,000 (table 22). These figures reveal an equity figure of 57 percent in relation to current value.

Country of Origin--U.S. corporations with foreign interests acquired 63 percent of the acreage; foreign persons not affiliated with a U.S. corporation acquired the remaining 37 percent (table 23). Foreign persons from Canada and West Germany and the United Kingdom accounted for the largest number of parcels reported, representing 34 percent of the reported acreage during the period. An additional 20 percent of the acreage is owned by U.S./Third Tier entities, U.S. corporations without an identifiable country of origin because no foreign country of origin was listed through the third tier of ownership.

Most of the acres acquired during this period were in the South

Interest in Land

Of the reported foreign-acquired parcels of U.S. agricultural land, 84 percent (accounting for 84 percent of the reported acres) were acquired in fee interest whole (table 25). Partial interests were acquired in 9 percent of the parcels, representing 11 percent of the acres.

Method of Acquisition

More parcels of agricultural land were acquired by foreign owners for "Cash Only" than by all other methods of acquisition combined (table 25). Of the total parcels, 55 percent, covering 38 percent of the total acreage, were reported as being acquired for "Cash Only." This compares with 21 percent of the parcels, covering 35 percent of the total acreage, which were reported as being acquired by "Credit Only." The "Other Method Only" category (which includes mergers, U.S. corporations which became foreign owned, land exchanged for stock in a corporation, and other arrangements) contains reports for 5 percent of the parcels and 3 percent of the acreage.

FOREIGN OWNER	117	41,114
TOTAL	587	331,822

^{1/} THE FEE INTEREST PARTIAL IS USED FOR THOSE PARCELS WHICH ARE OWNED ONLY IN PART BY THE FOREIGN INVESTOR; THAT IS, A PERCENTAGE INTEREST LESS THAN 100 PERCENT.

Relationship of
Representative to
Foreign Owner

Attorneys filed forms for the largest number of parcels, 37 percent, containing 47 percent of the acres (table 25). Attorneys may have accounted for the largest number of filings because they were involved in the transactions and filed the forms when the transactions occurred. Foreign owners accounted for the next largest number of parcels, 20 percent, reflecting 12 percent of the acres. Managers filed forms for only 17 percent of the parcels covering 25 percent of the acreage.

Land Use

Of the acres acquired during 1983, 51 percent were forest land (table 26). Cropland, pasture, and other agricultural land totaled 146,934 acres, or 44 percent of the acquisitions. Five percent of the acreage acquired was reported in the "Other Non-agriculture" category. No foreign country of origin had exceptionally noticeable acquisitions among the various use categories except for unidentifiable Third Tier foreign persons who acquired 71,770 acres, or 43 percent, of the forest land acres.

Separating out data on reports for only forest land or forest land and other nonagricultural land shows that 47 percent of all reported acquisitions are in these two land-use categories (tables 18 and 27). The remaining 53 percent is primarily farmland, although it includes some forest and/or other nonagricultural land commonly reported as part of the farmland acquisitions (table 26).

Unidentifiable Third Tier foreign persons purchased most of the U.S. forest land or forest and other nonagricultural lands (table 28). These corporations account for 46 percent of such acquisitions, 71,770 acres.

Corporations account for the largest number of owners reporting acquisitions of forest land or forest and other nonagricultural land--64 percent of the owners reported acquiring 81 percent of the parcels covering 88 percent of the acres (table 29). Twenty-four percent of the owners were individuals who reported acquiring 10 percent of the parcels covering only 4 percent of the acres.

Owners of parcels with less than 1,000 acres, 60 percent of all owners, reported acquiring 26 percent of the parcels covering only 4 percent of the forest or forest and other nonagricultural lands (table 30). The remaining 40 percent of the owners, owning parcels with 1,000 or more acres, reported acquiring 74 percent of the parcels covering 96 percent of these lands.

Intended Use

The reports for acquisitions indicated no change in land use for 87 percent of the acres (table 31). Intended changes to other agricultural use and nonagricultural use were reported for

TABLE 31--INTENDED USE OF U.S. AGRICULTURAL LAND ACQUISITIONS OF FOREIGN OWNERS, JANUARY 1-DECEMBER 31, 1983
(NUMBER)

ITEM	NO CHANGE	OTHER AGRICULTURE	OTHER NON-AGRICULTURE	NO REPORT	TOTAL
INDIVIDUAL:					
PARCELS REPORTED	150	16	23	5	194
ACRES	31,397	5,495	2,010	361	39,263
ORGANIZATION:					
PARCELS REPORTED	320	20	47	6	393
ACRES	255,739	22,247	14,399	174	292,559
TOTAL:					
PARCELS REPORTED	470	36	70	11	587
ACRES	287,136	27,742	16,409	535	331,822

Temure

Foreign owners directly operate 42 percent of the parcels acquired during the period and 62 percent of the acres, whereas tenants operate 30 percent of the parcels and 19 percent of the acres (table 32). Managers, however, operate only 8 percent of the parcels and 8 percent of the acres. No responses on temure were received for 20 percent of the parcels covering 11 percent of the acres. Foreign owners operate parcels accounting for 41 percent of the value, whereas tenants operate parcels accounting for 34 percent of the value.

Rental agreements were reported for 31 percent of the parcels covering 21 percent of the acres acquired during this period. Of the rental agreements, cash agreements accounted for 72 percent of the parcels covering 71 percent of the acres.

Temure Change

Reports for 37 percent of the parcels acquired during the period indicate no temure change for 29 percent of the acreage (table 32). Reports for 41 percent of the acquired parcels containing 59 percent of the acres indicated a temure change. Because the number of acres affected by new temure arrangements was not reported, the acreage may be overstated; that is, all of these acres are not necessarily affected by new temure arrangements. No responses on temure change were made for 22 percent of the parcels accounting for 12 percent of the acres.

Dispositions
and Land-Use and
Status Changes

Data in this section are derived from the 354 reports (table 33) filed by foreign persons who disposed of U.S. agricultural land, 5 reports for land-use changes into agriculture, 3 reports for land-use changes out of agriculture, and 10 reports for changes in status from foreign to nonforeign between January 1 and December 31, 1983. Dispositions totaled 229,118 acres, land-use changes into and out of agriculture occurred for 1,614 and 335 acres, respectively, and changes in status to nonforeign accounted for 282,524 acres.

For the same reasons noted at the outset of the acquisitions discussion, the reported data for dispositions and land-use and status changes should be regarded as preliminary for the 1983 report year. Reports that were not timely filed and/or completed or statutorily were not required to be filed by the closing date for this report are not included.

Characteristics
of Foreign Owners
Disposing Land

Type of Foreign Owner--The largest amount of acres which were disposed was in Oregon and covered 53 percent of the total dispositions acreage (table 33). The greatest number of dispositions occurred in Texas, accounting for 26 percent of the parcels and 11 percent of the acreage. Twenty-five States reported no dispositions during the period.

TABLE 33--DISPOSITIONS OF U.S. AGRICULTURAL LAND BY TYPE OF FOREIGN OWNERS,

Transfers by foreign investors to U.S. purchasers accounted for 59 percent of the parcels and 72 percent of the acres (table 34). Reports for 23 percent of the parcels and 10 percent of the acres indicated that they were transferred to other known foreign persons. Reports for 12 percent of the parcels covering 14 percent of the acres indicated dispositions to persons of unknown citizenship.

Corporations were the most active type of foreign owner disposition of land--accounting for 49 percent of the owners, 55 percent of the parcels, and 79 percent of the acres (table 35). In comparison, individuals accounted for 35 percent of the owners, 27 percent of the parcels, and 10 percent of the acres.

Size of Disposition--The most acreage disposed was for parcels with 1,000 or more acres, accounting for 87 percent of the acreage (table 36). As should be expected, sales prices per acre were higher for smaller parcels. Average selling price of acreage in the less than 20-acre range was \$35,569 per acre compared with \$278 per acre in the 1,000 or more acre range. Average selling price of all reported dispositions was \$1,090 per acre.

Country of Origin--Foreign persons from Canada and West Germany and U.S./U.K. corporations disposed of the most parcels of land accounting for 50 percent of the disposed parcels (table 37). The most acreage was disposed by U.S./Luxembourg corporations which sold 51 percent of all the dispositions acreage.

Most of the dispositions occurred in the West, covering 19 percent of the parcels and 66 percent of the acres (table 38). U.S./Luxembourg corporations disposed of 77 percent of the acreage in this region. The South accounted for 61 percent of the disposed parcels and 28 percent of the acres. Foreign persons from Canada and unidentifiable Third Tier foreign persons not associated with a U.S. corporation were responsible for 45 percent of the acres disposed in the South.

Land Use

Of the acres disposed in the report period, 10 percent were cropland, 68 percent pasture, and 15 percent forest land (table 39). The largest dispositions of cropland were made by foreign persons from Canada not affiliated with a U.S. corporation, foreign persons from West Germany, and U.S./Panama corporations which accounted for 47 percent of the disposed acres in this land-use category. U.S./Luxembourg corporations disposed of the most pastureland, 75 percent of the total. U.S./Canada corporations disposed of the greatest amount of forest land, 53 percent, followed by unidentifiable Third Tier foreign persons not associated with a U.S. corporation, accounting for 29 percent of the forest dispositions.

Trends

The data for 1983 are skewed toward the first three quarters of

1/ VALUE IS PURCHASE PRICE OR NONPURCHASE PRICE (ESTIMATED VALUE).

sequently, all of the transactions for October, November, and December are not reported to USDA by the December 31 closing data for each report year. Some of the skewing is also due to reports that are not timely filed and/or completed by that closing date. The foregoing discussion also means that the current year data, and in some instances data for prior years, are understated and should be regarded as preliminary. In addition, unlike the net data in the acquisitions section, the acquisitions figures here are gross figures for each year.

IMPACTS OF
FOREIGN
OWNERSHIP

Section 5 of AFIDA requires USDA to determine the impacts of foreign ownership of U.S. agricultural land, particularly the effects on family farms and rural communities. In general, the quantity of foreign-owned U.S. agricultural land remains so small that it is unlikely to have either a positive or negative overall impact on agriculture. However, in areas of heaviest concentration, some communities could be affected.

The 1982 report on foreign investment in U.S. agricultural land summarized the impacts of foreign ownership on family farms and rural communities in selected counties in California, Iowa, and Mississippi. The Department is continuing to examine additional areas for impact research.

In addition to AFIDA, numerous States also have laws for monitoring or restricting foreign landownership. As of December 31, 1983, 30 States had some type of law restricting alien ownership of land: Arkansas, California, Connecticut, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Virginia, Wisconsin, and Wyoming.^{6/}

Many of these restrictions date from the 19th century and have a wide variation in the degree of their restrictiveness. Some merely prohibit the sale of land to enemy aliens, while others place an acreage and/or time limit on the alien ownership, while still others attempt to strictly prohibit the purchase of land by aliens. The records of enforcement in these States also vary greatly. Some States have established active compliance programs while others have few or no reported enforcement actions.

Since the midseventies, there has been a noticeable amount of State legislative activity in enacting legislation that restricts, regulates, or monitors foreign investment. Since 1977, 7 of the 30 States with some kind of foreign landownership restriction have strengthened existing or enacted new legislation

to restrict or regulate such foreign ownership: Arkansas, Iowa, Minnesota, Missouri, North Dakota, Pennsylvania, and South Dakota.

In addition to the restrictive or regulatory enactments, since 1975, 14 States have enacted legislation that either establishes a program which requires foreign landowners to report their holdings or authorizes the State agency responsible for monitoring foreign investment to use information that is already being reported to the Federal Government: Arkansas, Florida, Georgia, Illinois, Iowa, Kentucky, Minnesota, Missouri, North Carolina, North Dakota, Ohio, Pennsylvania, South Dakota, and Virginia. The State reporting programs, some of which are modeled after the AFIDA legislation, require foreign owners of U.S. real estate, primarily agricultural land, to report their holdings and/or transactions to specified State agencies. Iowa was the lead State in enacting foreign ownership reporting requirements in 1975. Prior to 1975 there were no such reporting requirements in any State.

EFFICIENCY AND EFFECTIVENESS

Section 5 of AFIDA requires the Secretary to report on the efficiency and effectiveness of the reporting requirements in section 2 of the act. Efficiency is interpreted to mean the costs of current procedures. Effectiveness is interpreted to mean compliance.

Administration of the AFIDA program for obtaining and analyzing the data has required an estimated 10.8 staff-years at a cost of \$310,200 to the Department for the past year. The Agricultural Stabilization and Conservation Service contributed approximately 8.9 staff-years at an estimated cost of \$263,100. The remaining costs and staff-years are attributable primarily to the Economic Research Service, with some contributions by the Office of the General Counsel and the Office of Governmental and Public Affairs. In fiscal year 1983 and the first quarter of fiscal year 1984, the Department assessed 174 penalties amounting to \$109,500.

APPENDIX: REPORT FORM ASCS-153

Form Approved - OMB No.

			CHECK	

NOTE P.L. 95-460 authorizes collection of the data on this form. The data will be used to determine the effects of foreign persons acquiring, transferring and holding agricultural land, and the effects of such activity on family farms and rural communities. Furnishing the data is mandatory. Failure to comply or falsification of reporting is subject to civil penalty, not to exceed 25 percent of the fair market value of the interest held in the tract on the date of the assessment of such penalty. The data may be furnished to any Agency responsible for enforcing the provision of the Act and to the public.

IMPORTANT

DEFINITION: "Person" means any individual, corporation, company, association, firm, partnership, society, joint stock company, trust, estate, or any other legal entity.

You are a "foreign person" under the provisions of P.L. 95-460 and must complete the front side of this form (ASCS-153) if your answer to each of these three questions is "No".

	YES	NO
1. I AM a citizen of the United States		
2. I AM a citizen of the Northern Mariana Islands or the Trust Territories of the Pacific Islands.		
3. I AM lawfully admitted to the United States for permanent residence, or paroled into the United States, under the Immigration and Nationality Act.		
OR if your answer to any of these three questions is "Yes".		
4. I AM a "person" other than an individual or government, which is created or organized under the laws of:		
a. A foreign government or which has its principal place of business located outside the United States.		
b. Any State of the United States, and in which 5% or more interest is held directly or indirectly by any foreign individual, government, or legal entity.		
5. I AM a foreign government.		

INSTRUCTIONS

Complete this form in an original and three copies for each tract of land. Report as a tract all acreages under the same ownership in each county or parish. Land in different counties or parishes must be reported as separate tracts. Insertion of carbons is necessary.

Return the original and two copies to the Agricultural Stabilization and Conservation Service (ASCS) county office where the tract of land is located or administered. Retain the last copy (*Foreign Person Copy*) for your records. **DO NOT SEND THIS FORM DIRECT TO WASHINGTON, D.C.**

After the original disclosure on ASCS-153 on the tract(s) of land owned by the same person within a county or parish, each subsequent change of ownership or use must be reported by filling another ASCS-153.

Item 1. ONLY ONE BOX MAY BE CHECKED. If the tract of land to be listed under item 2 was:

1. Owned on February 1, 1979, check ^A LAND HOLDING and return the completed form by August 1, 1979.

If the tract of land to be listed under item 2 was, on or after February 2, 1979:

2. Acquired, check ^B LAND ACQUISITION ; or

3. Disposed of, check ^C LAND DISPOSITION ; or

4. Changed from non-agricultural to agricultural use, check ^D LAND USE CHANGE TO AGRICULTURE ; or

5. Changed from agricultural to non-agricultural use, check ^E LAND USE CHANGE TO NON-AGRICULTURE
and return the completed form within ninety (90) days after the transaction.

Item 3E3c. If incorporated or formed in the United States as an independent, affiliate, or subsidiary company, show the State of incorporation or formation.

If the answers to 3E3 b and c are "United States" or any "state", list the name of all foreign persons who hold any interest in your organization and their address, citizenship of individual, country of government, and country of incorporation or principal place of business of organizations.

Item 8. This date would be as follows for activity checked in Item 1:

- Box A and B - When acquired.
- Box C - When disposed of.
- Box D and E - When land use changed.

ADDITIONAL INFORMATION (Use additional sheets if more space is needed)
